

CHILD RIGHTS ANNUAL REPORT 2023

(additionally covering 1 January- 12 March 2024)

LPHR has [long-documented](#) systematic and widespread violations of Palestinian children's human rights in the occupied Palestinian territory. An enormously intensified upsurge in grave violations against and affecting Palestinian children have been inflicted in 2023, and are ongoing into 2024.

Grave violation incidents and patterns are outlined in this Child Rights Annual Report 2023, which additionally covers the opening ten weeks of 2024. An overview immediately below clarifies the scope of exceptionally serious violations against Palestinian children:

- As of 12 March 2024, at least [31,184](#) Palestinians have been killed in Gaza since 7 October 2023, **with at least [12,550](#) of those killed being children**, according to Gaza's Ministry of Health figures. [36](#) Israeli children have been killed, according to Israeli authorities, the majority on 7 October. **LPHR has consistently stated that the scale, speed and specific location of Palestinian civilian casualties raises extreme alarm that Israeli military forces are instituting a targeting policy in Gaza which clearly appears to violate the international humanitarian law principles of distinction, proportionality and precautions in attack, amounting to apparent atrocity crimes.**
- Children in Gaza are starting to die from malnutrition, dehydration and hunger, according to [UN experts](#). **As of 12 March 2024, at least [23 children](#) are reported to have died of starvation and dehydration** in Gaza. As the risk of famine rises, according to [humanitarian officials](#), all children under five (335,000 children) are at high risk of severe malnutrition, with serious adverse impacts on their development and right to health. **LPHR outlined in a [legal briefing](#) on 13 October that the Israeli government's announcement of a siege policy on Gaza clearly appears to constitute the war crime of starvation against a civilian population.**
- Children in Gaza have been maimed at a devastating rate. [UNICEF](#) reported in December that after ten weeks of conflict around 1,000 children in Gaza had lost one or both of their legs.
- [UNICEF](#) reported that as of 2 February 2024, at least 17,000 children are estimated to be unaccompanied or separated from their parents in Gaza.

- At least [90%](#) of children under five are affected by one or more infectious diseases, and 70% have diarrhoea. Most water and sanitation facilities have been damaged or destroyed or are otherwise non-operational or accessible, according to [UN OCHA](#), putting children at increasing risk of deadly diseases.
- **144 children were killed by Israeli soldiers and settlers in the West Bank between 1 January 2023- 4 March 2024, the majority shot by Israeli forces using live ammunition, including a two-year-old boy, four-year-old girl and an eight-year-old boy.** A [report](#) by the UN High Commissioner for Human Rights published on 13 February 2024 and examining the period between 1 November 2022- 31 October 2023, found that 84 children, 81 boys and three girls, were killed by Israeli security forces in the West Bank. At least 28 were hit above the waist, including 14 in the head, raising concerns that lethal force may have been used intentionally. The UN report found that in the vast majority of cases, use of force by Israeli security forces did not comply with the requirements of legality, necessity and proportionality. **LPHR's Child Rights Bulletins have consistently documented the clearly apparent unlawful use of live ammunition against Palestinian children by Israeli forces with effective impunity.**
- Four Palestinian children, aged between 11 and 15 years old, were killed when Israeli forces fired a missile from an Apache attack helicopter at a group of Palestinian civilians, most of them children, during a military incursion into Nour Shams refugee camp in the West Bank.
- Palestinian children detained by Israeli forces continue to report being subject to physical abuse, strip searches, threats and other ill-treatment. **In July 2023, LPHR and Save the Children announced a landmark call for an [immediate moratorium](#) on Israeli authorities arresting, detaining and prosecuting Palestinian children, due to severe and pervasive harm being perpetrated against children within Israel's military detention system.**
- Two schools were destroyed by Israeli authorities in the West Bank, 140 schools have been destroyed or sustained major damage in Gaza, and access to education has been deprived to 625,000 children in Gaza since 7 October.
- In 2023 alone, a total of 1,152 Palestinians, including [575 children](#), were displaced in the West Bank when Israeli authorities demolished or [forced them](#) to demolish their homes citing lack of Israeli-issued building permits, which are almost impossible to obtain.

The key incidents and statistics outlined in this bulletin span a range of violation categories: 'Fatalities', 'Injuries', 'Settler Violence', 'Arrests and Detention', 'Interference against Education', 'Displacement and Demolitions'. They are collated from the UN Office for the Coordination of Humanitarian Affairs (UN OCHA) and local human rights organisations: Defence for Children International-Palestine (DCIP), Al Mezan Centre for Human Rights, Yesh Din, Military Court Watch (MCW) and B'Tselem.

This bulletin outlines the specific rights of the [United Nations Convention on the Rights of the Child \(UNCRC\)](#) that apply to the key incidents affecting Palestinian children in the occupied Palestinian territory (oPt). As the occupying power, Israel has legal responsibilities under international conventions, including the UNCRC, for the safety, welfare, and human rights protection of civilians living in the oPt.

In Gaza, the [vast majority](#) of the [31,184](#) Palestinians [reported](#) to have been killed since 7 October 2023 and as of 12 March 2024 are women and children. We are unable to include these incidents in this report due to its sheer scale. The enormity of civilian casualties raises deeply grave concern that Israeli military forces are instituting a targeting policy in Gaza which violates the fundamental international

humanitarian law principles of distinction, proportionality and precautions in attack, amounting to clearly apparent atrocity crimes.

- [UN experts](#) and [the Director General of the World Health Organisation](#) report that at least 10 children have died of starvation in Northern Gaza, and there are fears that the figures could be higher in other hospitals. Article 6(1) of the UNCRC provides that every child has the inherent right to life. Under international law, lethal application of force can only be used as a last resort when there is a direct and imminent threat to life or serious injury. Israeli forces have long been documented to consistently apply lethal application of force where there is lack of evidence to suggest any direct and imminent threat to life. Violations of this legal requirement resulting in an unlawful extrajudicial killing should entail individual criminal responsibility. Indeed, part of providing meaningful protection under the UNCRC

involves investigation of, and accountability for, child deaths caused by unlawful application of force. To fulfil its obligations under international law, it is necessary that the Government of Israel thoroughly and transparently investigate the circumstances of the above-mentioned fatal shootings and ensure legal accountability and justice is delivered where there is criminal wrongdoing. However, there is strong evidence indicating that Israel is systemically failing to provide genuine accountability for child deaths, with data collected by the Israeli human rights organisations, [B'Tselem](#) and [Yesh Din](#), clearly demonstrating that Israeli soldiers who harm or kill Palestinians are very rarely indicted.

Israel's [policy](#) of withholding bodies of Palestinians, including children, who have been killed by Israeli forces, appears to amount to collective punishment against families, which is prohibited under international humanitarian law. It may also constitute cruel, inhuman, or degrading treatment or punishment of the families of the deceased, a violation of international human rights law, including Article 7 of the International Covenant on Civil and Political Rights, because of the mental distress it inflicts on the family.

INJURIES

- [DCIP](#) reports that on 4 February 2024, Israeli forces unleashed an attack dog on a four-year-old Palestinian boy in the northern occupied West Bank. Israeli forces released the military dog into a family home, after carrying out an arrest operation in Balata refugee camp. The dog attacked the four-year-old after knocking him out of his mother's arms, and repeatedly bit him.
- [DCIP](#) reports that on 25 January 2024, Israeli forces severely beat a 15-year-old Palestinian boy in Hebron on his way to buy bread. Three Israeli soldiers approached the boy and began beating him at around 14:40 near his home in Hebron. The soldiers were chasing another child, who fled, before grabbing the 15-year-old and punching, slapping, and verbally abusing him. The boy reports temporarily losing his vision during the prolonged assault.
- [UN OCHA](#) records that in Gaza between 1 January 2023- 6 October 2023, 86 boys and 25 girls were injured by Israeli forces, the majority by air-launched explosives and live ammunition.

Article 3(2) of the UNCRC provides that states shall ensure children the protection and care necessary for their well-being. The enormous number of children injured by Israeli forces prima facie violates both the letter and the spirit of Article 3(2).

SETTLER VIOLENCE

[UN OCHA](#) reports that 2023 saw the highest number of settler attacks against Palestinians in the occupied West Bank, including East Jerusalem, in any year since UN OCHA started recording incidents in 2006. Incidents in which Israeli soldiers escorted armed settlers invading Palestinian homes were documented; at least 403 children were injured in settler related incidents between 1 January 2023- 4 March 2024. At least 38 children were directly injured by settlers.

Incidents of settler violence between 1 January 2023- 4 March 2024 include:

- [B'Tselem](#) reports that on 11 October 2023, a five-year-old Palestinian girl was shot in the shoulder by Israeli settlers, after settlers threw stones and fired shots at the girl's family home. Reportedly, Israeli soldiers standing nearby did not intervene.

- [UN OCHA](#) reports that on 1 September 2023, the single remaining Palestinian household in the herding community of Al Baqa'a (Jerusalem), comprising eight people, including five children, left the community following a series of settler attacks.
- [UN OCHA](#) reports that on 4 August 2023, a Palestinian child was run over and injured by an Israeli settler in the H2 area of Hebron city.
- [UN OCHA](#) reports that in two separate incidents, on 7 and 10 July 2023, two Palestinian children were run over by settlers near the entrances of Beit Ummar (Hebron) and Huwwara (Nablus).
- [UN OCHA](#) reports that on 2 July 2023, a Palestinian child was injured when Israeli settlers blocked a road next to Yasuf village in Nablus and threw stones at Palestinian vehicles.
- [UN OCHA](#) reports that on 28 June 2023, settlers physically assaulted and injured two Palestinian children while they were grazing their livestock in Al Mu'arrajat East (Ramallah).
- [UN OCHA](#) reports that on 10 May 2023, a group of Israeli settlers, some armed, shot and injured two Palestinians and physically assaulted a Palestinian child in Deir Dibwan (Ramallah).
- [UN OCHA](#) reports that settlers injured six children between 28 March -17 April, including a nine-year-old girl, who was injured when stones were thrown at Palestinian vehicles.
- [UN OCHA](#) reports that on 14 – 27 March 2023, Israeli settlers injured two children in separate attacks.
- [UN OCHA](#) reports that an eight-year-old boy was injured when Israeli settlers attacked Palestinian property by throwing stones and empty bottles in Tal Rumeida and Wadi Al Hussein (Hebron) on 7 and 8 March 2023.
- [UN OCHA](#) reports that on 6 March 2023, a two-year-old Palestinian child was injured when Israeli settlers entered Huwwara and threw stones at Palestinian houses and vehicles.
- [UN OCHA](#) reports that between 14 – 27 February 2023, three children were among the 13 Palestinians injured by Israeli settlers and people known or believed to be settlers.
- [UN OCHA](#) reported that between the end of 2022 and August 2023, 12% of 63 Palestinian herding communities (home to around 10,000 people, 51% of them children) had been displaced as a result of settler violence and settlers preventing access to grazing land. Four communities had been completely displaced. Six had over 50% of their residents leave. In seven other communities, more than 25% of the community had left.

- [UN OCHA](#) subsequently reported in February 2024 that at least 1,539 Palestinians were displaced during 2023, citing Israeli settlers' violence and shrinking access to grazing land as the main reasons, compared with 774 people in 2022. Of them, 1,208 (81 per cent) were displaced in the aftermath of 7 October, amid a significant increase in violence by Israeli settlers against Palestinians, including physical attacks and death threats. Those displaced have moved to towns or other rural areas that they consider safer. Most of those displaced were in the governorates of Ramallah, Nablus and Hebron, which also have the highest number of Israeli settlement outposts. At least fourteen Palestinian communities were completely displaced during 2023 and now stand empty. In some of these communities, Israeli forces demolished the remaining structures, including at least two schools.

Article 3(2) of the UNCRC provides that states should ensure the protection and care of children, as is necessary for their wellbeing. The ongoing violent attacks on children by Israeli settlers strongly indicates that Israel is in breach of Article 3(2). The Israeli human rights organisation [Yesh Din](#) reports that incidents of violence by Israeli civilians against Palestinians and their property are a daily occurrence throughout the West Bank and that these incidents are rarely investigated properly by Israeli law enforcement. Moreover, only 3% of the investigations into complaints filed by Palestinians injured by settlers lead to convictions.

The low rate of investigations into attacks by Israeli settlers suggests that Israel is in violation of its obligations under **Article 39 of the UNCRC**, which stipulates that states should take all appropriate measures to promote the physical and psychological recovery of a child victim of abuse, and that such recovery should take place in an environment which fosters the health, self-respect and dignity of the child.

ARRESTS AND DETENTION

Between 1 January 2023- 4 March 2024, [UN OCHA](#) reports that Israeli forces conducted thousands of search-and-arrest operations across the West Bank. The total number of Palestinian children arrested by Israeli forces is not known. Children continued to be arrested during night-time raids on their family homes. As of 31 December 2023, [Military Court Watch](#) reports that there are 137 Palestinian children (12 – 17 years old) being held in Israeli military detention facilities, 49 of them under administrative detention (detention without charge or trial, which can be renewed indefinitely). [Military Court Watch](#) reports that since 7 October, a marked deterioration in prison conditions has been reported, with children being punched and beaten with batons, attacked with dogs and denied medical attention.

Arrest and detention incidents in the reporting period include:

- [DCIP](#) reports that on 19 January 2024, Israeli forces burned a 17-year-old Palestinian prisoner with cigarettes after severely beating him.
- [DCIP](#) reports that on 10 January 2024, a Palestinian child recently released from administrative detention was attacked by an Israeli military dog while detained.
- [Military Court Watch](#) reports that Palestinian child detainees released as part of a prisoner exchange deal in November 2023 were replaced with a fresh supply of child detainees by December 2023.
- [DCIP](#) reports that a 17-year-old Palestinian child who was repeatedly beaten and held in solitary confinement for 31 days, was released in November 2023. Israeli forces first detained the boy on 21 March 2023, before isolating him in solitary confinement for 31 days. The boy reports that he was interrogated on an almost daily basis during solitary confinement. He reports that on 21 October 2023, Israeli forces stormed his cell and strip-searched and beat him. The boy reports that he and other children were repeatedly and severely beaten. He reports having water poured over his clothes in extremely cold weather, and having his mattress and blanket confiscated.
- [Military Court Watch](#) reports that on 10 August 2023, a 13-year-old boy from Bethlehem was arrested by Israeli soldiers. In sworn testimony, the boy describes being repeatedly assaulted, strip-searched, left in an outdoor cage overnight and having to use the toilet in front of Israeli soldiers.
- [Military Court Watch](#) reports that on 10 August, a 16-year-old boy was arrested during a night-time raid at his grandmother's home. In sworn testimony, he reports being beaten and verbally abused by soldiers, strip-searched, left in an open cage, and threatened with a two year prison sentence if he did not confess to stone throwing, before being released without charge.
- [Military Court Watch](#) reports that on 8 August 2023, a 17-year-old boy was arrested during an Israeli night-time raid on his home. In sworn testimony, he reports that four soldiers in his bedroom aimed their guns at him, being repeatedly physically assaulted and left with a fractured hand. The boy reports that his interrogator shouted at him to confess to stone-throwing, threatened to keep him in prison for a long time, and told him that he'd had his father's work permit revoked.

- [Military Court Watch](#) reports that on 8 August 2023, a 16-year-old from Aida Camp was arrested by Israeli soldiers from home during the night. In sworn testimony, the boy reports being held in solitary confinement for three days, strip-searched and kept in an outdoor cage. He was released without charge a week later. He reports that his father’s work permit was revoked.
- [Military Court Watch](#) reports that on 18 April 2023, a 14-year-old boy from Beit Ummar was detained by Israeli soldiers from home. In sworn testimony, the boy reports waking to find ten masked Israeli soldiers in his bedroom. He reports not being informed of the reason for his arrest, being strip-searched, and physically and verbally abused. He reports being blindfolded during his interrogation. The boy was pressured into signing a document in Hebrew and confessing to stone throwing. He was released from prison on 2 August 2023.
- Further children’s testimonies of their arrest, ill-treatment and detention during the reporting period can be found [here](#).

Article 37(a) of the UNCRC states that no child shall be subjected to torture or other cruel, inhumane, or degrading treatment or punishment. **Article 19 of the UNCRC** provides that State Parties shall take all appropriate legislative, administrative, social and educational measures to protect the child from all forms of physical or mental violence while in the care of any person who has the care of the child. In its General Comment No. 8, the Committee on the Rights of the Child indicated that “There is no ambiguity: ‘all forms of physical or mental violence’ does not leave room for any level of legalized violence against children”. Frequently documented acts of systematic ill-treatment of children, possibly rising to torture, during Israel's military detention process, has led [independent legal experts](#) – funded by the UK Government – to conclude that Israel is in breach of Article 37(a) of the UNCRC.

Article 3(1) of the UNCRC obliges states to ensure that: ‘In all actions concerning children, whether undertaken by public or private social welfare institutions, courts of law, administrative authorities or legislative bodies, the best interests of the child shall be a primary consideration’. Further, **Article 37(b) of the UNCRC** states that no child shall be deprived of his or her liberty unlawfully or arbitrarily and that it shall be used only as a measure of last resort and for the shortest appropriate period of time. The continued arbitrary arrests of children, and the physical abuse of children who have been detained, suggest that Israel is in breach of both the spirit and the letter of Article 3(1) and 37(b).

Please see [LPHR's briefing](#) on Israel's military of Palestinian children for an accessible analysis of material legal and human rights issues arising from Israel's military detention of Palestinian children.

In July 2023, LPHR and Save the Children announced a landmark call for an immediate moratorium on Israeli authorities arresting, detaining and prosecuting Palestinian children, due to severe and pervasive harm being perpetrated against children within Israel's military detention system.

INTERFERENCE AGAINST EDUCATION

Infringements on education in the reporting period of 1 January 2023- 4 March 2024 include:

- UN OCHA reports that 625,000 students in Gaza had no access to education and over 5,000 students and 240 teachers had been killed as of 13 February 2024.
- [UN OCHA](#) reports that 60% of Gaza's schools (350 out of 563) have been damaged.
- [UN OCHA](#) reports that 92% of all school buildings in Gaza are being used as shelters for IDPs and/or have sustained damage. Some 390 schools (78.8% of the total school buildings in Gaza) sustained damage, including 140 schools that sustained major damage or were fully destroyed. Combined, these schools previously served some 433,000 children and more than 16,200 teachers.
- [Save the Children](#) reports that hundreds of teachers have been killed and about 75% of schools, colleges, and universities have been completely destroyed or damaged in Gaza, as of 24 January 2024.
- As mentioned in the fatalities section above, [DCIP](#) reports that Israeli forces destroyed parts of the Al-Baraem Kindergarten in Nour Shams refugee camp in the West Bank on 27 December 2023.
- [B'Tselem](#) reports that on 7 August 2023, about three months after residents of 'Ein Samia were forced to abandon their homes and lives in the community which lies northeast of Ramallah, Civil Administration personnel arrived with a military escort, proclaimed the site a closed military zone and demolished the school that community residents built in early 2022. The forces confiscated all the equipment inside the school as well. On 22 May 2023, the last remaining residents of the community, which numbered 200, were forced to leave their homes after Israel had made their lives unbearable, in part through settler violence. According to UN figures, the 'Ein Samia community school was one of 44 schools in the West

Bank under threat of demolition, eight of them in East Jerusalem. About 4,800 students attend these schools.

- [B'Tselem](#) reports that on 7 May 2023, at around 4:00 A.M., Civil Administration personnel arrived with a military escort, a digger, a bulldozer, trucks and a crane, to the school in the community of Jub a-Dib. The forces demolished the school, which serves 42 students, and confiscated a structure used as a storage room as well as furniture, appliances and electronics: 40 chairs, 10 desks, two office desks, two refrigerators, a computer, a TV and a printer. On Wednesday, 10 May 2023, at around 4:30 P.M., Civil Administration personnel returned to the wreckage of the school with a military escort and confiscated two tents local residents had set up as temporary classrooms and about 40 chairs and declared the school a closed military zone. The Civil Administration demolished the community's school once before on 22 August 2017, and it was rebuilt by community residents.
- [B'Tselem](#) reports that on 3 Jan 2023 Some of the forces then went on in a jeep to the community of Khirbet a-Safai al-Foqa, which lies in Masafer Yatta within the area the military designated "Firing Zone 918", and confiscated a folded tent. The tent, which teachers put up and took down daily to use as a classroom, was donated by the Red Crescent after Israel demolished the community school on 23 Nov. 2022 and confiscated tents donated to serve as classrooms on 6 Dec. 2022.
- [B'Tselem](#) reports that on 7 May 2023, at around 4:00 A.M., Civil Administration personnel arrived with a military escort, a digger, a bulldozer, trucks and a crane, to the school in the community of Jub a-Dib. The forces demolished the school, which serves 42 students, and confiscated a structure used as a storage room as well as furniture, appliances and electronics: 40 chairs, 10 desks, two office desks, two refrigerators, a computer, a TV and a printer. On Wednesday, 10 May 2023, at around 4:30 P.M., Civil Administration personnel returned to the wreckage of the school with a military escort and confiscated two tents local residents had set up as temporary classrooms and about 40 chairs and declared the school a closed military zone. The Civil Administration demolished the community's school once before on 22 August 2017, and it was rebuilt by community residents.

Article 28 of the UNCRC stipulates that education should be accessible to all children on the basis of equal opportunity, obliging Israel to ensure that children in the oPt have unrestricted access to education. Attacks on schools in Gaza and the demolition of schools in the West Bank strongly appear to breach both the spirit and the letter of Article 28.

DEMOLITIONS & DISPLACEMENT

Home demolitions and displacement remain a matter of huge concern. As of early March 2024, over 60% of housing units in Gaza have been destroyed or damaged (over 70,000 housing units destroyed). [UNICEF](#) reports that at least 17,000 children are estimated to be unaccompanied or separated from their parents in Gaza. In the West Bank, UN OCHA [reports](#) that 2023 saw the highest number of displacements – about 4,000 Palestinians - due to demolitions since recording began in 2009. Data collected by [UN OCHA](#) records that at least 1,256 children (603 girls and 653 boys) were displaced by the demolition of 1398 structures (111 of them donor funded) in the West Bank, including East Jerusalem, during the reporting period of this bulletin.

Article 27 of the UNCRC protects children’s right to a standard of living and seeks to ensure that this standard is adequate with respect to the child’s physical, mental, spiritual, moral, and social development. The UNCRC further adds that State Parties are responsible for taking appropriate measures to provide assistance in respect to nutrition, clothing and housing. The actions of the Government of Israel in rendering children and their parents homeless and disrupting families’ livelihoods through demolitions of homes, clearly violates both the letter and the spirit of the UNCRC.

Article 18(2) of the UNCRC obliges State Parties to give appropriate assistance to parents and legal guardians in the performance of their child-rearing responsibilities. Demolitions and subsequent forced displacement violate this right as it harms parents and legal guardians’ ability to fulfil their responsibilities of looking after and providing shelter for their children.

Article 16(1) of the UNCRC protects children’s rights to not be subject to arbitrary or unlawful interference with his or her privacy, family and home and **Article 16(2)** entitles children to the protection of the law against such interference or attacks. Demolitions affect this right as it physically displaces children from their family homes without first giving them access to a legal system through which they could challenge such actions.
